

UK-France Civil Nuclear Partnership Forum, Paris France

Thursday 18th October 2018

Following the success of its first edition in 2017, the Department for International Trade in France, in partnership with the French Nuclear Energy Industry Group GIFEN, is organizing the second **UK-France Civil Nuclear Partnership Forum** on **18th October 2018 in Paris la Défense**.

The first forum held at the British Ambassador's Residence in France was a big success - attended by over 180 high quality delegates representing 160 business and organisations.

This year's tailored programme will feature a day of presentations, B2Bs and networking opportunities. The objective of the event is to build on the strengths of both the French and UK supply chains to access opportunities in the nuclear markets and promote international collaboration on both sides of the Channel.

Programme overview

08.30 Registration opens

09.00 Opening Remarks

- HMA Edward Llewellyn OBE, British Ambassador to France
