High Value Manufacturing

## Nuclear strategy Getting your team ready to win work in civil nuclear

Breaking into the nuclear sector demands vision and commitment from every part of your business.

This introductory workshop will give you a clear understanding of the opportunities in the nuclear supply chain, and the practical tools you will need to engage your staff through strategic thinking and policy deployment.

The half-day event will help you understand:

- What support is available through the Fit For Nuclear programme, and whether F4N is right for your business.
- How to identify and close any gaps in your capabilities or performance, to meet nuclear industry requirements.
- Why you need a strategic approach to business improvement for nuclear.
- How to link your strategic vision to effective deployment tools to engage all your operational staff.

The workshop is designed for senior directors who want to better understand how they can win work in nuclear, and need to share their vision with the people who will deliver it. It's also a great opportunity to learn more about F4N; meet our nuclear specialists and industrial advisors; and gain a deeper understanding of strategic planning and deployment for business excellence.

**NMC Venue**

49 Birmingham Road, West Bromwich B70 6PY  
[www.nmcvenue.com/location.aspx](http://www.nmcvenue.com/location.aspx)

**F4N**  
Fit For Nuclear

Fit For Nuclear (F4N) helps manufacturers assess and develop their readiness to bid for work in nuclear new build, operations and decommissioning.

Delivered exclusively by the Nuclear AMRC, the free F4N service lets UK manufacturers measure their operations against the standards required to supply the nuclear industry, and take the necessary steps to close any gaps.
